

# SHUPACK

## SOFT A30

- Soft filling / shock absorbing material
- Stays soft even in cold weather conditions
- Adhesion to the sole
- 1 minute setting time (at room temperature)
- Becomes hot during setting (in case of sensitive feet use SHUSIL)

**SHUPACK soft A30** is a soft fast setting hoofpad material offering more comfort for the horse. It can be used with or without pads for support as well as shock absorbing purposes. It can also give great benefits for foundered horses.

Comes in 250cc cartridges fitting in standard caulking guns. Fill up to ground level for support of foundered and laminitis cases. When used without pads, usage of meshes is recommended, but not obliged. Set time approx. 1 minute. Temperature and humidity might have effect on the performance of this product.

### PRODUCT APPLICATION

#### Standard application

- With pads

#### Alternative application

# SHUSIL SOFT A10

- Very soft filling material
- Stays soft even in cold weather conditions
- No adhesion to the sole
- 4 minutes setting time (at room temperature)
- If heated upto body temperature, setting time becomes 2 minutes
- Keeps low temperature during setting
- Acid free

**SHUSIL A10** is a silicone product to be used as hoofpad material. Can be used as filling or light shock absorbtion.

250cc cartridges fitting in standard caulking guns. Offers protection and light shock absorbtion for the hoof. Always use SHUSIL in combination with Shupads! SHUSIL does not contain acids or chemicals and are therefore very suitable in combination with wound treatment. Setting time 4 minutes, depending on weather conditions. Heating up SHUSIL before use speeds up setting time significantly. Temperature and humidity might have effect on the performance of this product.

# SHUDIM AIR

## ULTRA LIGHT A20

- Ultra light pad material
- Non toxic
- Setting time 4-5 min (at room temperature, heated 2-3 min)

**SHUDIM Air** is an ultra light impression material to be mixed by hand. It's mostly used for filling, light shock absorption or just to give more comfort to the horse. Since the product is very soft it is only possible to fill complete hoofs.

Lightweight impression material for shock absorption and protection. Easily mixable and shapeable by hand. The ultra light SHUDIM Air is available in 2100 cc in durometer A20 and weighs 35% less than any standard impression material in the industry. SHUDIM is a non irritating product. Easy to cut which makes it applicable in many situations. SHUDIM does not contain acids or chemicals and is very suitable in combination with wound treatment. Temperature and humidity might have effect on the performance of this product. Heating up SHUDIM before use speeds up setting time significantly.

# SHUDIM SUPER SOFT A15

- Very soft impression material
- Non toxic
- Skin friendly (not irritating or causing allergic reactions)
- Setting time 4-5 min (at room temperature, heated 2-3 min)
- Easily mixable and shapeable by hand
- Can be combined with any medical application to the hoof

**SHUDIM Super Soft A15** is an extra soft impression material to be mixed by hand. It's mostly used for filling, light shock absorption or just to give more comfort to the horse. Since the product is very soft it is only possible to fill complete hoofs. In case of laminitis or other cases where there is an extremely painful area of the sole pad that needs to be isolated, the impression material can be trimmed away once it is cured after applying the shoe and pad.

Lightweight impression material for shock absorption and protection. Easily mixable and shapeable by hand. SHUDIM is a non irritating product. Easy to cut which makes it applicable in many situations. SHUDIM does not contain acids or chemicals and is very suitable in combination with wound treatment. Temperature and humidity might have effect on the performance of this product. Heating up SHUDIM before use speeds up setting time significantly.

# SHUFIX WHITE

- Super fast setting time (1,5 minutes at room temperature)
- Easy to rasp
- Hard but flexible material
- High temperature while setting (keep +/- 1 cm / 0.4" from coronary band)

**SHUFIX White** is an ultra fast urethane glue which is very suitable for making extensions on foals' hoofs and custom plastic shoes. Also suitable for retouching or rebuilding heels, making medial/lateral corrections and for smaller hoof repairs. In severe winter circumstances SHUFIX can also be used to glue most kind of glue-on shoes. Since it's a urethane product, the hoof should be dry and clean before applying SHUFIX.

250cc cartridges fitting in standard caulking guns. Curing time of 1,5 minutes (at room temperature), workable after about 5 minutes. Temperature and humidity can influence the performance of this product.

## PRODUCT APPLICATION

# PRE FIX ACTIVATOR AND CA GLUE

- 5 seconds fast setting superglue
- Bonds once 2 components are in contact

**PRE FIX** is a system to bond a GLUSHU to the foot just to keep it in place. It is a 2 component superglue which will bond the GLUSHU to the hoof in seconds. This allows you to do the actual glueing of the shoe with the foot on the ground. PRE FIX is very useful if you have a very nervous horse or a horse that is unable to stand on three legs (laminitis or injury). PRE FIX is no structural glue. It is temporarily only to keep the GLUSHU in place for the time you need until the actual glue is cured. One component is the activator spray, the other component is a transparent gel in a squeeze bottle.

PRE FIX is used in 2 steps. Once you fitted and shaped the GLUSHU and you are ready to glue, apply the PRE FIX CA GLUE on the GluShu and spray the activator on the hoof. After pre fixing the shoe you can further finish the glueing on the ground with SHUBOND for permanent fixation.

## PRODUCT APPLICATION

### Standard application

- Only for pre-application of GLUSHU shoes
